

Re: Cuyahoga County
Brook Park

November 28, 1979

The Honorable Angelo Wedo
Mayor; Brook Park
City of Brook Park
6161 Engle Road
Brook Park, Ohio 44142

Dear Mayor Wedo:

On 27 November 79, a meeting was held in your office, in attendance were, you, representatives of Euthenics, Inc. and this writer.

After the meeting we went to the Brook Park service building where the acting/assistant service director met us. We then viewed this area. All deposited wastes were noted as having been covered. It was recommended that the fill area's final slope be cut and all the area covered with a minimum of two feet of compacted cover material and then seeded. The final slope should be as close to 4:1 as possible to prevent erosion.

We then viewed the city's property across from the former tank plant. All of the fly-ash and other materials that have been deposited in this area need to be removed a minimum distance of fifty feet from the banks of Abrams Creek. The same must be done with the large drainage swale whose course is through the copse of trees.

All of the area must then be covered with a minimum of two feet of compacted cover material, graded to assure positive drainage toward Abrams Creek (all side slopes should be 4:1), and all areas seeded.

From here we then viewed the southerly bank of Abrams Creek as it flows west from the Brook Park service building area. This area is going to require quite a bit of work. No wastes have been deposited in this area but the Bank's were noted in several areas to be sloughing into and toward the creek.

You stated that the city's engineers, Euthenics, Inc., will prepare any necessary plans and oversee all work that will be necessary to bring these areas to the levels required.

If there are any questions regarding this letter or any other matter, please contact me at (216)-425-9171. Thank you for your cooperation in this matter.

Yours truly,

Jack L. Burgan, R.S.
District Solid Waste Scientist
